

# VCU RE challenge Rough Notes

---

## RE Challenge

---

### Initial Prompt

The zip file has been uploaded to the same directory. The password is the name of the file "softwarechallenge\_expert".

The input is completely randomized and the seed will change every time you run the file. The input password field will require hex chars and not just printable ascii. Once you figure out how its randomized, you will need to write a python script with decryption methods to open it and send correct input.
